

Blu RCU

OVERVIEW

The cutting-edge technology of Bluetooth® wireless connectivity will transform the way you hear the sounds of life. The optional Blu RCU not only controls hearing aid functions, but also allows our digital hearing instruments to stream high-quality, stereo sound from many popular audio devices such as TVs, mobile phones, MP3 players, and more. Don't let your hearing problems alter your quality of life.

FEATURES

The innovative Blu RCU allows you to stay connected to all your favorite sounds and high-tech gadgets, even if you have hearing problems. Using Bluetooth® technology, the Blu RCU streams high quality audio from mobile phones, TV's, computers, MP3 players and more to any Rexton product with Blu Link technology. Blu RCU doubles as a remote control for the instruments, allowing volume and program changes at the touch of a button. Ask your hearing health professional if Blu RCU is right for you. Schedule an appointment today.

Available with: Insite, Cobalt+ and Bridge hearing devices from Rexton

Mobile Phone

You won't have to worry about missing another phone call due to your hearing problems. Instead, you can enjoy phone conversations directly through your hearing instruments, in stereo. Distracting background noise is softened while feedback is eliminated effortlessly. An audible signal will alert you that a phone call is incoming, and you can decide with the touch of a button to take or reject the call.

Television and Movies

Watching TV programs and movies with friends at home can be difficult with hearing problems. Blu RCU can make this enjoyable once again. At a range of up to 30 feet, you can stream sound from the television using your handy Blu RCU combined with the pre-paired transmitter. There is no detectable delay between what you'll see on screen and what you hear through your hearing instruments. It's like a personal headset that allows you to listen to TV at a level that's audible and clear for you and also comfortable for others nearby.

Stereo and Music

Discover the joy of music again! Any Rexton instrument with Blu Link technology can connect wirelessly to stereos and MP3 players using the Blu RCU. Sound is streamed to both hearing instruments in stereo, transforming them into personal headphones.

Remote Control

OVERVIEW

Ask your hearing health professional for a demonstration of how easy the optional remote control is to use.

FEATURES

With wireless technology, you can put the control of your instruments at your fingertips with an optional remote control. Easy, inconspicuous, and individualized. Let us help you find a hearing health professional in your local area.

Available with: Insite, Cobalt+, Bridge, Gem+ and Day hearing devices from Rexton

Charger

OVERVIEW

With Rexton's optional charging unit, there is no more worry about dying hearing aid batteries or losing power at inconvenient times. Similar to charging a mobile phone, the instruments are ready to run all day after a six-hour charge overnight. For added convenience, many of our BTE's are also compatible with standard batteries. The charger also includes a drying function that removes harmful moisture from the hearing aids, improving long term reliability and performance. Eliminate daily hearing aid battery hassles and try our worry-free charger.

FEATURES

Developed with convenience in mind, our Green & Easy technology allows select Rexton hearing aids to be charged overnight using a handy charging unit for a full day of trouble-free operation. No more worrying about batteries.

Humidity and moisture can spell trouble for sophisticated hearing instrument components. That's why the Rexton charger includes a drying function that will leave instruments dry and refreshed each morning. Don't forget to pick up your Green & Easy charger when you purchase your hearing aids. Let us help you schedule an appointment with a hearing health professional in your local area.
