Upgrade to first-class hearing.

Introducing the new Insite+. If you want the best of everything, the hi-tech features of Insite+ provide an unsurpassed hearing experience and will keep you plugged in, entertained, and in-the-know.

Features vary by product level. Talk to your hearing health professional for a complete feature list and to determine which product is right for you.

REXTON

REXTON

Speech

Elegant people love easy, free-flowing conversations and clear-as-crystal speech, even if it comes from behind.

NEW! Focus 360°

Goes beyond the capabilities of traditional directional microphones to enhance the dominant speech signal even if it occurs behind or to the side. With Insite+, you'll more clearly hear someone speaking from the backseat of a car or walking alongside.

Automatic Multi-channel Adaptive Directional Microphone

Gives you the best possible speech clarity in listening environments involving multiple speakers and other noise. Working automatically, this feature suppresses up to four separate noise sources simultaneously.

Automatic Noise Reduction

Improves comfort and speech audibility by analyzing incoming signals and separating out continuous, non-speech noise without you having to make adjustments.

reddot design award
winner 2010

Listen up! And sideways. And backwards.

Sound that's easy on the ears.

Comfort

First-rate sound comfort on the golf course, in the spa, in the boardroom, wherever life takes you.

NEW! Feedback Preventer

Accurate, thorough, and even faster than before, it frees you from embarrassing and annoying feedback (whistling) before you or anyone nearby can hear it.

NEW! Sound Radiance

Do you appreciate listening to the brilliant sounds of music? Sound Radiance enhances the perception of high pitches for fuller and richer sound and improves sound quality for audio streamed with Rexton's Blu RCU.

Sound Locator

Rexton products equipped with Sound Locator mimic the natural function of the outer ear and help you find sound sources easily for greatest sense of confidence, increased safety, and the most natural hearing experience.

SoundSmoothing®

For the ultimate in sound comfort, it quickly softens unpredictable and bothersome sounds like breaking glass or keys jingling without any adverse affect on desirable speech signals.

Top notch hearing aids do the tough stuff.

Set & Go

Relax and live your life without fussing with hearing aid controls. Insite+ technology does all the work, automatically.

Automatic Environment Management

Like the central nervous system of Insite+. This technology automatically classifies the listening situation and engages or disengages features to help you overcome the challenges you could face.

Automatic Equalizer

Optimizes frequency response and sound impression based on your listening environment for easier wearing with less adjustments.

Convenience

Insite+ is one superb problem-solving partner. The latest in **Bluetooth®** applications and rechargeability connect you to the gadgets you love.

Blu Link

Insite+ uses Blu Link technology, which allows you to connect with virtually any multimedia device via the Blu RCU remote control.

Green & Easy

Eco-friendly technology lets you charge Insite+ overnight for a full day of trouble-free operation. The handy Rexton charging unit even contains a drying function, removing harmful moisture and leaving hearing aids dry and refreshed each morning.

Wireless Assistant

Optimizes your hearing aids' sound quality and ease of use. Automatically synchronized digital signal processing eliminates potential differences in critical features from hearing aid to hearing aid. There's even a convenient remote control with easy-to-see buttons.

Insite+ and Blu RCU

Insite+, equipped with Blu Link technology, is for people like you who want first-class technology that works with, not against, your favorite high-performance gadgets. Stay connected to TV, movies, friends, family, music, and more.

Blu RCU

Stay connected to all your favorite sounds and high-tech gadgets. Using **Bluetooth** technology, Blu RCU streams high quality audio from mobile phones, TV's, computers, MP3 players and more to any Rexton product with Blu Link technology. Blu RCU doubles as a remote control for the hearing aids, allowing volume, treble, and direct program changes at the touch of a button.

Mobile phone

Don't miss another phone call. Enjoy phone conversations directly through your hearing aids while distracting background noise is softened and feedback is eliminated effortlessly.

Television and Movies

Enjoy watching TV with friends at home again. Blu RCU is like a personal headset that streams sound from the TV with no detectable delay between what's on screen and what you'll hear through your Insite+ hearing aids.

Stereo and Music

Get back the joy of music. Using Blu RCU, sound is streamed from MP3 players and stereos to both hearing aids.

Transmitter

With your already-paired transmitter, you can connect to any media device, hassle-free.
