

Beige, Brown, Gray, Granite, Charcoal, Pearl White, Silver, Sandy Brown

Simply Good Looking

You don't mind standing out, but you don't necessarily want your hearing aids to do so. Bridge+ is a master of disguise in natural colors that blend with most skin and hair tones. Eight colors are available: Beige, Brown, Gray, Granite, Charcoal, Pearl White, Silver, and Sandy Brown.

For over 50 years, Rexton has listened to the unique needs of Hearing Health Professionals and people with hearing loss around the world and reacted quickly to their needs. Rexton develops a full line of solutions for all types of hearing loss and lifestyle needs with value, innovation, quality, and usability in mind. We strive to put our customers first at every opportunity and to make better hearing more accessible to all people.

REXTON

Master the art of comfortable listening.

Introducing the new Bridge+. If you're too busy enjoying yourself to deal with a hearing solution's hassles, ultra-reliable Bridge+ provides a comfortable hearing experience and more natural sound so you can live life to the fullest.

Features vary by product level. Talk to your hearing health professional for a complete feature list and to determine which product is right for you.

Speech

Always up for a free exchange of thoughts, feelings, and opinions? Bridge+ gives you the newest technology for clear-as-a-bell speech.

Automatic Multi-channel Adaptive Directional Microphone

Gives you the best possible speech clarity in listening environments involving multiple speakers and other noise. Working automatically, this feature also suppresses up to four separate noise sources simultaneously.

Automatic Noise Reduction

Improves comfort and speech audibility by analyzing incoming signals and separating out continuous, non-speech noise without you having to make adjustments.

Listen here!
And there.
And everywhere.

Comfort

Comfy, advanced sound on the beach, in the yoga studio, walking in the woods, wherever life takes you.

Sound that soothes.

NEW! Feedback Preventer

Accurate, thorough, and even faster than before, it frees you from embarrassing and annoying feedback (whistling) before you or anyone near by can hear it.

NEW! Sound Radiance

Do you appreciate listening to the brilliant sounds of music? Sound Radiance enhances the perception of high pitches for fuller and richer sound and improves sound quality for audio streamed with Rexton's Blu RCU.

SoundSmoothing®

For the ultimate in sound comfort, it quickly softens unpredictable and bothersome sounds like breaking glass or keys jingling without any adverse affect on desirable speech signals.

Convenience

Bridge+ is one smart cookie. And environmentally responsible too. Enjoy the latest in Bluetooth wireless technology applications and rechargeability.

Blu Link

Bridge+ uses the Blue Link technology which allows you to connect with virtually any multimedia device via the Blu RCU remote control.

Effortless & carefree.

Green & Easy

Eco-friendly technology lets you charge Bridge+ overnight for a full day of trouble-free operation. The handy Rexton charging unit even contains a drying function, removing harmful moisture and leaving hearing aids dry and refreshed each morning.

Wireless Assistant

Optimizes your hearing aids' sound quality and ease of use. Automatically synchronized digital signal processing eliminates potential differences in critical features from hearing aid to hearing aid. There's even a convenient remote control with easy-to-see buttons.

Set & Go

You have better things to do than waste time with hearing aid controls. Pursue life's pleasures while Bridge+ technology does all the work, automatically.

Automatic Environment Manager

Like the central nervous system of Bridge+. This technology automatically classifies the listening situation and engages or disengages features to help you overcome the challenges you could face.

Automatic Equalizer

Optimizes frequency response and sound impression based on your listening environment for easier wearing with less adjustments.

Bridge+ and Blu RCU

Bridge+, equipped with Blu Link technology, is for people like you who yearn for technology that works in harmony with their favorite high-performance gadgets. Stay connected to TV, movies, friends, family, music, and more.

Blu RCU

Stay connected to all your favorite sounds and high-tech gadgets. Using *Bluetooth* technology, Blu RCU streams high quality audio from mobile phones, TV's, computers, MP3 players and more to any Rexton product with Blu Link technology. Blu RCU doubles as a remote control for the hearing aids, allowing volume, treble, and direct program changes at the touch of a button.

Stereo and Music

Get back the joy of music. Using Blu RCU, sound is streamed from MP3 players and stereos to both hearing aids.

Transmitter

With the already paired transmitter, you can connect to any media device, hassle-free.

Mobile phone

Don't miss another phone call. Enjoy phone conversations directly through your hearing aids while distracting background noise is softened and feedback is eliminated effortlessly.

Television and Movies

Enjoy watching TV programs with friends at home again. Blu RCU is like a personal headset that streams sound from the TV with no detectable delay between what's on screen and what you'll hear through your Bridge+ hearing aids.
